Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/547,064

Applicant(s)

TAKIGUCHI, KIYOAKI

Examiner

DONNIE L. CROSLAND

Art Unit

2612

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 30-66 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 30-66 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 25 August 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 1-17-06 8-25-05.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: ____.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 30-66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vega et al (6275681) in view of Schyndel.

Vega shows a communication system with first communication device 105 and second communication device 106 for detecting change in electrification condition of the electrification target 102 (human body 205) and demodulating the information through demodulator 203, see figure 2B.

Vega does not use the term "quasi-electrostatic field".

Schyndel shows a communication system and provides for quasi-static electric fields.

It would have been obvious to one having ordinary skill in the art to provide quasi-static electric fields in the communication system of Vega because the use and advantages of a quasi-static electric field employed in a communication system is taught by Schyndel.

Any advantages seen are those naturally expected to occur due to the quasi-static electric field.

The portability of the device would not involve patentable invention as evidenced by the use of conventional card reader and tag reader employed in facilities such as at a guard desk or in a banking environment, see portable system in col. 6, lines 4-12 of Vega.

The human body is shown in figure 2B.

With respect to claim 36, modulation is provided in col. 7, lines 41-52 of Vega.

With respect to claim 38, electric power and electric charge are limited with respect to power manager 412; see col. 9, lines 41-67 and col. 10 of Vega.

With respect to claim 39, see "read range" in col. 5, lines 60-67 of Vega.

Claim 40, Schyndel provides for modulation with respect to distance, see col. 4, lines 57-67, and col. 5, lines 1-31. Schyndel does not state the specific equation as recited. The artisan recognizes that such is an engineering trade-off and would experience no difficulties in deriving a distance with respect to such equation.

With respect to claim 41, see storage means as indicated in processor 204 in figure 2B of Schyndel.

With respect to claims 42 and 43, the artisan recognizes a parallel plane electrode as evidenced in such systems that employ such in convention tag systems. It would have been obvious to one having ordinary skill in the art to arrange or place the electrodes in a plane for optimum performance in the system of Vega.

Claim 44 is an engineering trade-off and such would not involve patentable invention.

With respect to claim 52-66, the artisan recognizes leakage preventing with respect to ground capacitor 210 in figure 2B and disclosure with respect to earth ground. The artisan recognizes a parallel plane electrode as well as the equations recited in claim 64. Such are engineering trade-off and one of ordinary skill in the art would recognize such.

Conclusion

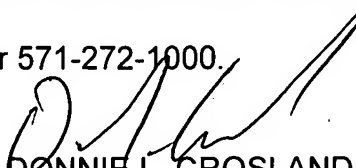

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Grimes et al, Vega et al (6147605), and Geiszler et al are cited as showing communication systems employing electrostatic field monitoring.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DONNIE L. CROSLAND whose telephone number is 571-272-2980. The examiner can normally be reached on Mon-Thur. 9:30a-6:00p.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, DANIEL J. WU can be reached on 571-272-2964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
